

User Manual

Congratulations on your purchase of our 6 feet long white PVC cables!

These cables are designed to support both charging and data transfer for your devices. Please read the following instructions carefully to ensure that you get the most out of your cables.

Compatibility:

The USB 2.0 to USB-C cable (big end) is compatible with newer models of devices that have a USB-C port. The USB 2.0 to Micro-USB cable (small end) is compatible with older models of devices that have a Micro-USB port.

Please make sure that your device has the correct port before using the cable.

Charging:

To charge your device using the cable, simply plug one end of the cable into your device and the other end into a USB port on your computer or a USB wall charger. Your device should start charging automatically.

Data Transfer:

To transfer data between your device and your computer, plug one end of the cable into your device and the other end into a USB port on your computer. Your device should appear as a removable drive on your computer, allowing you to transfer files between the two devices.

Note:

Please make sure that your device is unlocked and that the screen is on when transferring data. Some devices may require additional software or drivers to be installed before data transfer is possible.

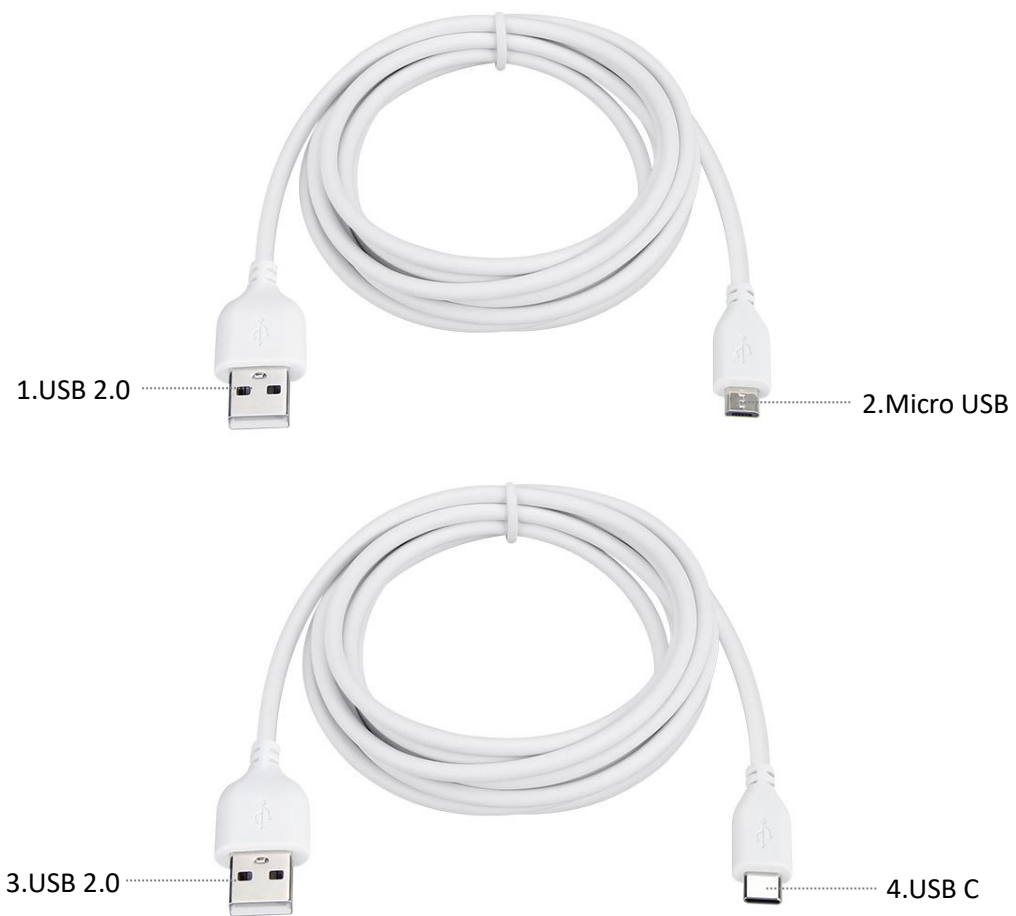

Care and Maintenance:

To ensure that your cables last as long as possible, please follow these guidelines:

- Do not expose the cables to extreme temperatures or moisture.
- Do not bend or twist the cables excessively.
- Do not pull on the cables to disconnect them from your device or computer.
- Store the cables in a cool, dry place when not in use.

We hope that you enjoy using your new cables! If you have any questions or concerns, please do not hesitate to contact us.
